ance Notes on Codes and Abbreviations" appearing at the begin-  
ning of each regular issue of the PCT Gazette.

(54) Title: METAL CONTAINERS HAVING AN EASILY OPENABLE END AND METHOD OF MANUFACTURING THE SAME

(57) Abstract: An improved easily openable end for a metal con-  
tainer, and a method of manufacturing the end are disclosed. The  
metal container is manufactured from a can body and two can ends,  
one of which is easily openable. The easily openable can end is  
manufactured from a metal substrate having a score line on its ex-  
ternal surface that permits easy removal of at least a portion of the  
can end from the can body. The score line of the easily openable  
can end is coated with an irradiation-curable coating composition  
that imparts corrosion resistance along the score line of the easily  
openable can end.
